Sir/Madam

Please kindly receive my application together with my documents for your consideration.

I graduated in March of 2023 with a National Diploma in Land Surveying at Mangosuthu University of Technology. Between then and now, I have successfully finished a four month Business course through the United States Embassy's mission to South Africa as well as a free online project management course with GL Academy.

Throughout my inservice training, I have come to realize that in order to be a success in my field, I will need further training by means of an Advanced Diploma in Geomatics which I have applied for at Tshwane University of Technology [TUT] and awaiting response.

I am hard working, diligent and focused. Through all my adversities I have always chosen to learn, reapply myself and come out stronger.

I greatly look forward to hearing from you.

Yours sincerely,

Londeka Ngcongo
