**Summary:** Dedicated young student currently studying towards being a Geoinformatician, with complimentary leadership experience as an RCL student leader in high school.

## **Career Objectives:**

- I aim to develop advanced skills in GIS (Geographic Information Systems), remote sensing, and other geospatial technologies to effectively analyse and interpret spatial data.
- I am preparing for roles in academia or industry sectors such as engineering, natural resources management, or government agencies, leveraging my geomatics expertise.
- I am committed to lifelong learning, staying updated with advancements in geomatics technology and methodologies to adapt to industry trends and challenges.

## **Skill Highlights:**

- Eagerness to learn new software, tools, and methodologies in the field of geomatics.
- Willingness to take on challenges and expand knowledge through coursework and practical experiences.
- Effective communication skills developed through coursework and group projects.
- Ability to collaborate effectively in team settings and contribute to shared goals.
- Developing analytical and critical thinking skills to solve basic geospatial problems.
- Interest in applying geomatics knowledge to real-world scenarios and challenges.

## **Personal Information:**

Name: Gugu  
Surname: Mabusela  
Date of birth: 6 February 2006  
Identity Number: 0602060651083  
Gender: Female  
Marital Status: Single  
Nationality: South African  
Languages: English & Isizulu  
Health Status: Good  
Criminal Record: None  
Hobbies: Reading, running, studying

## **Education:**

**Grade 12(Matric): 2023**

**Palmridge Secondary School**

**Subjects:** English HL, Afrikaans FAL, Life Sciences, Physical Sciences, Mathematics, Religious Studies, Life Orientation & Geography.

**Undergraduate student at the University of Cape Town(Studying GEOINFORMATICS)**

Date: 1 January 2024

To whom it may concern

**Requirement for Practical Training**

This letter serves to confirm that all students in the first and second years of the BSc Geomatics Degree at the University of Cape Town are required to participate in 10 days training in the workplace during their vacation times in both years. The specifications of this training are included in their course documentation which can be shared with the employer.

We are very grateful for all such opportunities afforded to our students. These help them in many ways, especially in gaining an understanding of the practical applications of geomatics.

Yours sincerely

**Prof J Whittal**
